

RoHS statement for Ultimaker materials

Date: October 19, 2018

Dear customer,

The restriction of Hazardous Substances Directive 2002/95/EC (RoHS) was adopted in February 2003 by the European Union and recasted into Directive 2011/65/EU in June 2011.

The RoHS Directive as amended is required to be enforced and become law in each member state. This directive restricts (with exceptions) the use of the following hazardous substances in the manufacture of various types of electronic and electrical equipment above the mentioned concentrations:

- Lead (Pb; 0.1%)
- Mercury (Hg; 0.1%)
- Cadmium (Cd; 0.1%)
- Hexavalent chromium (Cr6+; 0.1%)
- Polybrominated biphenyls (PBB; 0.1%)
- Polybrominated diphenyl ethers (PBDE; 0.1%)
- Bis(2-ethylhexyl) phtalate (DEHP; 0.1%)
- Butyl benzyl phtalate (BBP; 0.1%)
- Dibutyl phtalate (DBP; 0.1%)
- Diisobutyl phtalate (DIBP; 0.1%)

We declare, that during the production of Ultimaker materials (PLA, Tough PLA, Nylon, ABS, CPE, CPE+, PC, TPU 95A, PP, PVA, Breakaway) the substances above are not used as production aids or additives. These substances may therefore only be present in very small quantities as impurities. Our materials comply with Directive 2011/65/EU as amended up to and including the Delegated Directive (EU) 2015/863.

Mr. Jos Burger
CEO Ultimaker
